National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in National Register Bulletin, How to Complete the National Register of Historic Places Registration Form. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions.

1. Name of Property

Historic name: John E. Reagan House
Other names/site number: DO09:0142-060
Name of related multiple property listing: N/A
(Enter "N/A" if property is not part of a multiple property listing)

2. Location

Street & Number: 2102 Pinkney Street
City or town: Omaha
State: Nebraska
County: Douglas
Not for publication: []  Vicinity: []

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this [X] nomination [] request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60.

In my opinion, the property [X] meets [] does not meet the National Register Criteria. I recommend that this property be considered significant at the following level(s) of significance: [ ] national  [ ] statewide  [X] local

Applicable National Register Criteria: [ ] A  [ ] B  [X] C  [ ] D

Signature of certifying official/Title: SHPO/Director
Nebraska State Historical Society
State or Federal agency/bureau or Tribal Government

In my opinion, the property [ ] meets [ ] does not meet the National Register criteria.

Signature of Commenting Official: Date
Title: State of Federal agency/bureau or Tribal Government

4. National Park Service Certification

I, hereby, certify that this property is:
[ ] entered in the National Register.
[ ] determined eligible for the National Register.
[ ] determined not eligible for the National Register.
[ ] removed from the National Register.
[ ] other, (explain):

7. Description

Architectural Classification

LATE 19TH AND 20TH CENTURY REVIVALS: Classical Revival: Neo-Classical Revival

Materials

Principal exterior materials of the property: WOOD
Description

Summary Paragraph (Briefly describe the general characteristics of the property, such as its location, type, style, method of construction, setting, size, and significant features. Indicate whether the property has historic integrity.)

The John E. Reagan House, constructed in 1908-1909, is located on the northwest corner of North 21st and Pinkney Streets in Omaha, Douglas County, Nebraska. The prominent two-story home was designed in the Neo-Classical Revival style and is of frame construction. The home is situated directly to the west of Kountze Park and on the former site of the 1898 Trans-Mississippi Exposition. The immediate neighborhood is comprised of early twentieth century one to two-story homes, many of which have lost integrity and others that simply do not possess the grand style of the Reagan House. While in need of general maintenance and repair (painting, roof repair, etc.), the home possesses significant physical integrity.

Narrative Description (Describe the historic and current physical appearance and condition of the property. Describe contributing and noncontributing resources if applicable.)

Setting
The Reagan House is sited on the flat northwestern corner lot of North 21st and Pinkney Streets, across from the southwestern corner of Kountze Park. The property faces Pinkney Street to the south and is accessed from Pinkney Street by an historic concrete sidewalk leading to the central steps, with a smaller sidewalk leading east around the house to the back door. Early Sanborn Fire Insurance maps include a one-stall garage on the northern side of the home; however, the only evidence for a garage is a concrete pad in the general vicinity of where it is believed to have been historically located. Mature trees and shrubs are located on the lot and throughout the surrounding neighborhood. The building stock of the immediate neighborhood consists of mostly Foursquare and bungalow form frame houses dating to the first few decades of the 20th Century, with only three other Revival Style houses within a block of the Reagan House.

Exterior
This two-story Neo-Classical Revival home is clad in original wood siding and has a hipped roof with slight flares at each of its four corners and a moderate eave with a boxed overhang. A brick chimney punctuates the roof on the rear of the home. The reveal of the siding, around the entire house, increases after reaching the second story. A full basement and attic remain unfinished. Each of the home’s windows, unless otherwise noted below, is one-over-one double-hung wood sash. The foundation is mainly brick painted white.

Front (south façade):
The main façade of the home is symmetrically balanced with a full-width porch and full-height entry porch, which is enclosed on the second story to provide for additional living space. Three concrete steps lead up to the porch. The porch consists of a wooden clapboard wall, a painted wooden floor, and a roof supported by simple square posts, one at each corner and one flanking each side of the porch stairs. The main entry door has been replaced with a modern single panel wooden door and basic metal storm door. One large window flanks either side of the door. These windows are a single pane with a plain glass transom above, and each has been covered with decorative metal scrollwork bars. The projecting bay of the second floor is comprised of a series of three ribbon windows on each of the three sides, all of which are currently covered in plywood. A diamond-shaped panel with the address rests below the middle window on the southern ribbon. One window flanks each side of the bay on the second story. The full-height porch has a pediment front that is supported by two sets of three Tuscan columns, which rest on brick piers that have been painted white.

Rear (north façade):
The second floor of the rear of the home features two symmetrically placed windows, while the main floor has two windows side by side set off-center. A small projection with a hipped roof, which contains part of the kitchen, is placed on the western end. This projection rests on a foundation of cast concrete and may be a later addition, dating to no later than 1935. Trim and siding match the main home, but the foundation differs. One window is present on the northern side of

1 The projection is present on the 1935 Sanborn Fire Insurance map. The home was not yet constructed in 1901,
the projection while a door to access the kitchen is on the eastern side. This door is a modern single panel wood door with basic metal screen door. Stairs leading to the door are of poured concrete. Access to the basement/cellar is present on the rear of the home as well. It consists of a stone foundation/entry covered by a wooden board. An enclosed porch with a flat roof, which is likely original to the home, but may be an addition prior to 1935, is located on the eastern end of the rear façade. A set of five modern wooden stairs leads to a modern metal and glass storm door, which allows access to the porch. The remainder of the northern side of the porch is made up of two window openings with modern metal storms.

Side (east façade):
The enclosed porch, with access on the rear of the home, sits prominently on the eastern façade as well. The eastern side features three window openings with modern metal storms, which are currently covered with a plywood panel. The north side of the porch has two identical openings, also covered in plywood. Simple square columns support the porch in each corner. The porch floor, walls, and ceiling are wood. The southern side of the eastern façade features a two-story projecting bay. A single one-over-one double-hung window covered in plywood is located on each side and story of the bay. The front of the bay differs with a leaded glass window on the main floor and a small, single light horizontal widow on the second floor. Another single one-over-one double-hung window is located above the porch. The roofline of this façade is interrupted by a hipped-roof dormer with a single window opening, which is currently open to the elements.

Side (west façade):
The southern side of the western façade of the home contains a set of two windows, covered in decorate metal scrollwork, that project slightly and are covered with a hipped roof. The northern side has a set of paired windows covered with plywood. The second story of the home features one window set just off-center.

Interior
Finishes:
The majority of the home retains its original lathe and plaster walls and ceiling. Where it is not extant, walls consist of just lathe (plaster has been removed) or modern drywall/ceiling tiles. Floors consist of wood planks, some of which are covered with black and white linoleum tiles and other linoleum coverings. The majority of the original doors with original hardware, along with baseboards and door/window trim, remain. Many of the passageways retain historic decorative arches. Original metal heating grates remain throughout the home as well.

Main Floor:
The 766 square foot main floor consists of five rooms: kitchen, dining room, living room/parlor, bedroom and bathroom. Access to the basement is also located on the main floor. The kitchen was updated in the 1940s/1950s and is currently in a deteriorated state, although it retains its original size and placement. A small hallway with a pointed arch leads from the living area to the basement door, stairway leading upstairs, bathroom, and bedroom. The bedroom contains a closet and has doors to both the hallway and to the entry foyer and dining room. The passageway between the dining room and living room/parlor also has a shallow Tudor arch, while the passage into the foyer has an arch that takes on a hipped appearance.

Second Floor:
Accessed by a set of painted wood steps, the 786 square foot second floor consists of five rooms: a bathroom, two bedrooms, a kitchenette, and a living area, all arranged off of a circular hall area. One of the bedrooms and the living area are situated in the projecting bays on the south and east facades, which creates rather unique spaces. The bedroom on the western side of the home has two doors, one leading to the central hall, the other leading to the living area. Access to the attic is located on the second floor as well.

Integrity
While the home suffers from neglect and is in need of general maintenance and repair, it retains a very high level of integrity. The location and setting of the residence have changed very little since its construction. It is still located within a neighborhood of homes built at roughly the same time and adjacent to Kountze Park. The design of the home remains true to its original plan, with only minor alterations that occurred, more than fifty years ago, to make it feasible as a rental unit.
John E. Reagan House  Douglas County, Nebraska  
Name of Property  County and State  

The majority of original doors, hardware, woodwork, flooring, windows, and siding remain, while the feeling and association are still present in the home as well. Although the residence is in a deteriorated state, it still evokes the grand presence it did upon its construction. It is truly an imposing home that commands attention within its immediate neighborhood.
8. Statement of Significance

Applicable National Register Criteria
(Mark “X” in one or more boxes for the criteria qualifying the property for National Register listing.)

- **A** Property is associated with events that have made a significant contribution to the broad patterns of our history.
- **B** Property is associated with the lives of persons significant in our past.
- **X** C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- **D** Property has yielded, or is likely to yield information important in prehistory or history.

Criteria Considerations
(Mark “X” in all the boxes that apply.)

Property is:

- **A** Owned by a religious institution or used for religious purposes.
- **B** Removed from its original location.
- **C** A birthplace or a grave.
- **D** A cemetery.
- **E** A reconstructed building, object, or structure.
- **F** A commemorative property.
- **G** Less than 50 years of age or achieved significance within the past 50 years.

Statement of Significance Summary Paragraph
(Provide a summary paragraph that includes level of significance, applicable criteria, justification for the period of significance, and any applicable criteria considerations.)

The John E. Reagan House is locally significant under Criterion C as a prime example of the Neo-Classical Revival Style. Located in Kountze Place, the Reagan House exemplifies the grand homes that were constructed in this neighborhood at the turn of the century, while serving as an example of the change in style that took place after 1900. The period of significance is limited to 1908-1909, the years in which construction of the home occurred.
Narrative Statement of Significance  (Provide at least one paragraph for each area of significance.)

Background/History

Constructed in 1908-1909 for the family of John E. Reagan, the home at 2102 Pinkney Street sits as an excellent example of high style architecture in the Kountze Place neighborhood. First developed in the 1890s, Kountze Place proved as the exception to the rule of Omaha’s elite settling towards the West. Unlike other period Omaha neighborhoods such as Happy Hollow, Park Avenue, and the West Farnam-Cathedral areas, Kountze Place developed north of Omaha’s city center. Herman Kountze, “an early settler who helped build Omaha from a prairie village into a city,” owned the land of Kountze Place and began selling lots to Omaha’s upper middle class in the 1890s. This was made feasible due to the construction of streetcar lines that enabled those working downtown a means to commute. Located between 16th and 24th Streets and Locust to Pratt Streets, the Kountze Place neighborhood saw the majority of homes first constructed on Binney and Wirt Streets. Pinkney and Emmet also saw many of these early homes.  

While many of Omaha’s businessmen, including lawyers, doctors, real estate men, and architects were building homes in Kountze Place, the depression of the 1890s nearly halted construction for a number of years. However, construction started up again after the 1898 Trans-Mississippi and International Exposition was held on land within the neighborhood. The current Kountze Park (across the street to the east from the Reagan House), was the site of a grand lagoon that surrounded the “White City.” The attention drawn by the Exposition greatly encouraged a resurgence of home building in Kountze Place, and by 1902, the neighborhood again saw the pace of development seen before the depression.  

A March 1907 Omaha Sunday Bee advertisement highly promotes Kountze Place:

\[
\text{MAKE YOUR HOME IN KOUNTZE PLACE}
\]

Where you will find more homes of Omaha’s best business men than in any other addition in the city. This alone is one of the best reasons why you should live in this beautiful addition. PAVED STREETS, PERMANENT WALKS, WATER, SEWER and GAS. NO HILLS, NO HOLL OWS, GOOD SCHOOLS, CHURCHES, SH ADED STREETS, GOOD NEIGHBORHOOD. Within 10 or 15 MINUTES’ DRIVE or street car ride of the RETAIL and WHOLESALE DISTRICT, reached by 3 car lines, the Dodge, North 24th and Sherman Ave. The Florence Boulevard runs through the center of the Addition AND THE PRICES only about one-half what they are asking for no better lots in the Western or Southwestern part of the City.  

Another advertisement of 1907 promotes Kountze Place as “the very choicest, high class residence property on the north side,” and declares that “the wise business man who knows the value of a dollar, is buying in Kountze Place...”  

Aside from encouraging development, the Exposition also influenced the style of homes being built in Kountze Place. During its first building boom in the 1880s, the majority of homes were Victorian in style. The Exposition, with its buildings reminiscent of the Greek and Roman influences, led to an interest in Classical Revival styles. Also influencing the style of homes in Kountze Place were its residents; after 1900, the demographic of the neighborhood began to shift from less of the upper middle class toward more salesmen, small business owners, and a few blue collar workers. This meant that bungalows began to appear alongside the grand Victorians of the 1880s. However, high style homes continued to be built in the neighborhood until about 1910. By 1925, the neighborhood was fully-developed.

5 Sunday World-Herald, 10 November 1907, E-9.
6 Omaha City Planning Department, 11-13.
Along with the change in style came a change in use; many homes in Kountze Place began to be utilized as rentals.

Newspaper ads as early as the 1910s indicate that there were several rentals available, from individual rooms to entire homes. By the 1920s, more and more rental ads appeared, such as for the home at 2102 Pinkney, which became a rental immediately after Reagan and his family moved out in 1920. A May 1921 ad in the Omaha World Herald lists the Reagan House for sale:

Beautiful 8-room modern house at 2102 Pinkney. Screen porch. Sunroom, living room, dining room and den. Finished in mahogany, on the first floor: three rooms and bath and beautiful sunroom on second floor. Please do not disturb the tenant. Price $7,500...\(^7\)

As seen by the listing price of $7,500, the home, and presumably the neighborhood, still held good value. However, by this time, the demographic of the neighborhood was quickly shifting to that of the working class. By 1945, the home was listed for sale at only $5,000, with the advertisement encouraging its continued use as apartments.\(^8\)

**John E. Reagan**

The first residents of the home at 2102 Pinkney were John E. Reagan and his family (a wife and three children), along with a household servant. At the time of purchase, Reagan was a lawyer with specialties in handling estates and land values.\(^9\) He also owned a significant amount of real estate. Newspaper notices of the time indicate several properties, many within the Kountze Place neighborhood, which he rented out or had listed for sale. He took out at least one other building permit for home construction the same year as that for his residence at 2102 Pinkney Street.\(^10\)

Reagan, born in St. Louis, Missouri of Irish heritage, moved to Omaha in 1889.\(^11\) He began to practice law in 1896 and married Margaret Cannon in 1902.\(^12\) Margaret was a grand niece of Edward and John A. Creighton\(^13\), namesakes, founders, and financial benefactors of Creighton University in Omaha.

In 1910, at the age of 42, Reagan was elected as a democratic state senator for the Sixth Senatorial District. Serving during the 32\(^{nd}\) session in 1911\(^14\), he authored the “proposed constitutional amendment to allow cities of 5,000 and over to make their own charters.” He also served as the “chairman of the committees on public lands and buildings and miscellaneous subjects, and a member of the committees on apportionments, constitutional amendments and federal relations, judiciary, labor, library, manufacturing and commerce, privileges and elections and public charities.”\(^15\)

Before, during, and after his senate term, Reagan was heavily involved in local politics and community issues. He was included in the publication *Nebraskans* 1854 to 1904, which was compiled by the Omaha Bee as a “fair representation of the foremost men, who have helped to make Nebraska what it is, and without whom, no history of Nebraska could be written.”\(^16\) He was a member of the Catholic Church, the Improved Order of Red Men, the Friendly Sons of Ireland, and the

Moose. He served as the secretary and chairman of the Douglas County Democratic Central Committee\(^7\), and was supported quite strongly by the “Dahman Democracy,” a group named for and led by the mayor of Omaha from 1906-1918 and 1921-1930, James C. Dahman.

Reagan purchased the site for the home at 2102 Pinkney Street in March of 1908 and began construction almost immediately.\(^8\) Official city building permit records are no longer available, but newspaper notices list the home’s price between $3,000\(^9\) and $5,000,\(^10\) and a July 22, 1908 “Building Permits” entry in the Omaha World Herald, evening edition, notes that Reagan took out a building permit for a $2,500 frame dwelling.\(^11\) Reagan continued to live in the home until 1920. After this time, the property became a rental property, with two separate apartments, one on the first floor, and another on the second.

**James B. Mason – Architect**
The architect of the Reagan House was Scottish born James Bayne Mason. Emigrating from Scotland with his parents in 1850, Mason grew up in Whiteside County, Illinois. Little is known regarding Mason’s early career, but he appears to have entered the field of architecture working in Illinois as a carpenter and superintendent of construction. In the early 1880s Mason arrived in Omaha and worked as the manager of several large lumber mill companies from 1886 to 1891. Mason began his formal training in architecture as a draughtsman in 1891 and by 1893 was calling himself an architect. During his career Mason primarily focused his attention on residential architectural work, with the period from 1900 to 1910 being his most active. From 1902 to 1905, his office was located in the Brown Block (office #508) at 16\(^{th}\) and Douglas Streets. John Reagan also had his office in the Brown Block (office #509) from 1902 to 1910. It is not certain, but is likely that Reagan chose Mason to be the architect for his home due their familiarity with one another as a result of the close proximity of their offices. Additionally, the majority of Mason’s architectural work was centered in the developing suburbs to the north and west of downtown Omaha. Reagan was heavily involved in real estate and may have used Mason as his architect for earlier projects as well.\(^12\)

**Criterion C – The Neo-Classical Revival Style**
The John E. Reagan House is a prime example of the Neo-Classical Revival style. The home exhibits classic features of the style including a full-height porch supported by columns, which dominates the symmetrical façade. The home fits the subtype Full-Height Entry Porch with Lower Full-Width Porch, as identified by the McAlesters in their A Field Guide to American Houses. With most examples built between 1895 and 1915, this subtype is not as common as the Full-Height Entry Porch. Typical of both subtypes, the full-height entry of the Reagan House has a classical pediment with a gabled roof. Other features of the Reagan House that are typical of the style include its moderate overhang with boxed eaves and its double-hung rectangular windows and paired or tripled windows.\(^23\)

Spurred by the World’s Columbian Exposition of 1893, and more locally, the 1898 Trans-Mississippi and International Exposition held in Omaha, the Neo-Classical Revival style became popular for public, commercial, and residential buildings for several decades. The style borrows many elements from the earlier Greek Revival style, most notably, dominant columns topped by a pediment. While the style is less popular for residences than the more prevalent Colonial Revival style, it is seen in homes throughout the country from c. 1895-1950.\(^24\)\(^25\)

\(^7\) Omaha: The Gate City and Douglas County Nebraska, Volume II, A Record of Settlement, Organization, Progress and Achievement, 274-275.
\(^8\) Evening World-Herald, 27 March 1908, 1.
\(^9\) Ibid.
\(^10\) Sunday World-Herald, 21 June 1908, 14.
\(^11\) Evening World-Herald, 22 July 1908, 3.
\(^12\) Omaha City Directories and US Census Records
\(^14\) Ibid., 346.
While there are other examples of Neo-Classical Revival single-family residences built at the turn of the century in Omaha, only one is individually listed on the National Register: The George H. Kelly House (DO09:140-009) at 1924 Binney Street (listed 1983). Two Neo-Classical apartment buildings have been listed: The Sherman (DO09:137-004) at 2501 North 16th Street (listed 1986), and the Apartments at 2514 North 16th Street (DO09:138-005, listed 2010). Within the Gold Coast District (listed 1997), five contributing homes are classified as Neo-Classical, with several others possessing Neo-Classical elements.

Located within the Kountze Place neighborhood as well, the George H. Kelly House serves as a good comparison property for the John E. Reagan House. The Kelly House, while in the more high-style, Victorian area of Kountze Place, is also of frame construction and was built in 1904, just a few years prior to the Reagan House. Both Kelly and Reagan were well-to-do men of their era and regarded well by their community. Kelly, like Reagan, was included in the Omaha Bee’s publication of noteworthy men up to 1904. Both resided in the Kountze Place neighborhood until the 1920s (Reagan – 1920, Kelly – 1925). While both homes are of the Neo-Classical Revival style, the Kelly House is considered to be somewhat transitional in style. Its wrap-around porch, asymmetry, and shallow bays reflect the Queen Anne style more so than the Neo-Classical style. While the Kelly House is still a good example, the Reagan House can be argued as being much more representative of the Neo-Classical Revival style as applied to a residential structure. Its massing, form, and applied ornament all adhere much more clearly to the typical features of the style. Also in contrast, the Kelly House lost the majority of its interior integrity when it was divided into apartments in 1955 and then rehabilitated into “five modern dwelling units” in 1982.  

The Reagan House retains much of its interior integrity, even after being used as apartment housing for the majority of its life.

**Conclusion**

While currently in need of general maintenance and repair, the John E. Reagan House at 2102 Pinkney Street continues to embody the distinctive characteristics of the Neo-Classical Revival style. The Reagan House remains as one of the few homes in its immediate vicinity that retains architectural integrity; the majority of its neighbors have undergone significant changes. Even during its transition into use as apartments, the house has retained its grand appearance. A real estate notice from 1954 lists the property as such:

**IMPOSING EXTERIOR**

Every one who has passed (the) southwest corner of Kountze Park will remember the handsome home with big Colonial pillars at 2102 Pinkney St. now converted into 2 entirely separate apartments. Income and nice place to live....

The integrity of the home remains mostly intact throughout the interior as well as the exterior. Even after the conversion into an upper and ground floor apartment, finishings, layout, and architectural details remain. The exterior of the home, while in a rough condition, continues to evoke a sense of grandeur with its imposing porch with full-height columns and pediment. For these reasons, the John E. Reagan House is locally significant under Criterion C as an excellent example of the Neo-Classical Revival style.

Verbal Boundary Description (Describe the boundaries of the property.)
Kountze Place, Lot 16, Block 41, south 80 feet 47 x 80

Boundary Justification (Explain why the boundaries were selected.)
The boundary of the property consists of the footprint of the home and the yard immediately surrounding the home. This was the area historically associated with the property.

11. Form Prepared By

Name of Property

County and State

Additional Documentation
Submit the following items with the completed form:

- Maps: A USGS map or equivalent (7.5 or 15 minute series) indicating the property's location.
- Sketch map for historic districts and properties having large acreage or numerous resources. Key all photographs to map.
- Additional items: (Check with the SHPO for any additional items.)

Photographs
Submit clear and descriptive photographs. The size of each image must be 1600x1200 pixels (minimum), 3000x2000 preferred, at 300 ppi (pixels per inch) or larger. Key all photographs to the sketch map. Each photograph must be numbered and that number must correspond to the photograph number on the photo log. For simplicity, the name of the photographer, photo date, etc. may be listed once on the photograph log and doesn't need to be labeled on every photograph.

Photo Log
